Congress of the United States

Washington, DC 20515

November 12, 2026

The Honorable Todd Blanche
Attorney General
U.S. Department of Justice
950 Pennsylvania Avenue, N.W.
Washington, D.C. 20530

The Honorable Kash Patel
Director
Federal Bureau of Investigation
935 Pennsylvania Avenue, N.W.
Washington, D.C. 20535

The Honorable Jay Clayton
Director
Office of the Director of National Intelligence
1500 Tysons McLean Dr.
McLean, VA 22102

General Joshua M. Rudd
Director
National Security Agency
9800 Savage Road, Suite 6272
Fort George G. Meade, MD 20755

The Honorable John Ratcliffe
Director
Central Intelligence Agency
1000 Colonial Farm Rd.
Langley, VA 22101

Dear Attorney General Blanche, Director Clayton, Director Ratcliffe, Director Patel, and General Rudd;

As Chairman and Ranking Member of the House Permanent Select Committee on Intelligence (HPSCI) Subcommittee on the National Security Agency (NSA) and Cyber, we urge you to take immediate action to investigate the publicly reported relationship between NVIDIA chief executive Jensen Huang and Alice Huang, a former executive of the Singapore-based firm Megaspeed, who, reportedly, has been linked to People's Republic of China (PRC) intelligence.

The relationship raises significant national security concerns regarding PRC infiltration into one of the world's most valuable companies and PRC access to restricted high-performance graphics processing units (GPUs) and hardware. In PRC hands, this technology could be used to train military AI systems, accelerate cyber operations against U.S. networks, and expand state surveillance.

This case does not stand alone. The Intelligence Community consistently assesses the PRC as the most active and persistent cyber espionage threat to U.S. networks. China has repeatedly targeted U.S. officials and business executives to reach sensitive information and technology. That pattern raises the question whether interagency cooperation and information-sharing on suspected espionage are strong enough.

NVIDIA sits at the center of the technology competition between the United States and PRC. NVIDIA's advanced GPUs are the essential engine for large AI data centers and large language models (LLMs).

The leader in computing power and AI capabilities will shape the future of warfare, cybersecurity, and economic power. Export controls protect that lead, but only if we can detect and stop diversion.

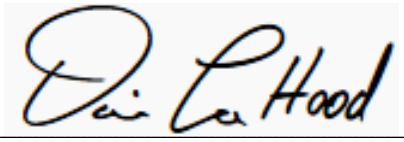

We ask that you pursue this matter thoroughly, and that you advise us whether your agencies are investigating any potential conspiracy, export control or sanctions violations, economic espionage, or other criminal activities.

Accordingly, we request that your agencies provide a written response and classified briefing addressing the following:

1. Are you investigating the matter and what is the scope of the investigation;
2. What is the chronology of any potential interactions between PRC intelligence and Alice Huang, along with Ms. Huang's current location;
3. What is the Intelligence Community's assessment of PRC intentions and methods for undermining U.S. leadership in advanced technology;
4. What information on the relationship was known to the Intelligence Community, when that information was gathered, and with whom the information was shared; and,
5. What additional statutory authority, resources, or congressional action DOJ believes would help prevent, investigate, and prosecute economic espionage more effectively.

We look forward to your response and to working more closely with you to protect our national security from our foreign adversaries. Thank you in advance for your prompt response.

Sincerely,

Darin LaHood
Member of Congress
Chairman, House Intelligence
Subcommittee on NSA and Cyber

Josh Gottheimer
Member of Congress
Ranking Member, House Intelligence
Subcommittee on NSA and Cyber

CC:
The Honorable Scott Bessent, Secretary of the Treasury
The Honorable Howard Lutnick, Secretary of Commerce
