

Congress of the United States

Washington, DC 20515

January 28, 2026

The Hon. Pamela Bondi
Attorney General
U.S. Department of Justice
950 Pennsylvania Avenue, NW
Washington, DC 20530-0001

The Hon. Kash Patel
FBI Director
Federal Bureau of Investigation
935 Pennsylvania Ave NW
Washington, DC 20535

Dear Attorney General Bondi and Director Patel:

Today, it was reported that the Federal Bureau of Investigation (FBI) executed a search warrant and raided the Fulton County Election Hub and Operation Center in Fulton County, Georgia, with the intent of investigating possible election interference in Georgia in the 2020 election.¹ This raid, under the pretext of the false and repeatedly debunked assertion of President Trump that he won the 2020 election, is yet another tactic designed to intimidate voters and undermine our democracy.

The 2020 election has been litigated. By continuing to raid election locations in Georgia, the Department of Justice (DOJ), this raid serves to intimidate Fulton County voters and election officials, rather than to further any legitimate law enforcement aim. Therefore, I call on you to recall FBI agents from Fulton County election sites, cease any future unjustified raid on election sites in Fulton County, and respond to questions about the origin, intent, and impact of this raid by Friday, February 13, 2026.

To be clear, the results of the 2020 election are not in question. Court after court has declared that there was no evidentiary basis to find that Donald Trump won the 2020 election or that election fraud occurred. In Wood v. Raffensperger (N.D. Ga. Nov. 20, 2020), a district court dismissed plaintiff's Equal Protection claim because there was no disparate treatment among Georgia voters. Next, the district court dismissed the plaintiff's Elections and Electors Clauses claim because Secretary Brad Raffensperger had not overridden or rewritten any state law.² This ruling undermined President Trump's claim that Georgia's Republican Secretary of State altered the process established by the Georgia legislature for handling defective absentee ballots.

In Trump v. Wis. Elecs. Comm'n (E.D. Wis. Dec. 12, 2020), the district court dismissed Trump's claim that Wisconsin officials violated his rights under the Electors Clause because said officials allegedly issued guidance on state election statutes that deviated significantly from the requirements of Wisconsin's election statutes.³ This ruling undermined President Trump's claim that the state of Wisconsin unlawfully departed from the state legislative scheme for appointing Presidential electors. In King v. Whitmer (E.D. Mich. Dec. 7, 2020), a district court stated that the claims of plaintiffs, Republican presidential electors, could be dismissed for lack of standing and was unpersuaded by the plaintiffs' claim that defendants violated the Elections and Electors Clauses.⁴ This ruling undermined President Trump's claims that the state of Michigan violated various state and federal laws by denying meaningful access for party representatives to observe the counting of votes, treating one class of Michigan voters (in person voters) differently than another class of Michigan voters (absentee/mail-in voters), and permitting widespread voter fraud due to the use of Dominion voting machines and software.

In Ward v. Jackson (Ariz. Sup. Ct., Maricopa Cnty. Dec. 4, 2020), a superior court denied relief requested by the plaintiff in an election contest because the plaintiff failed to provide sufficient evidence, failing to show fraud or misconduct.⁵ This ruling undermined President Trump's claim that Arizona election officials failed to allow observation of signature

verification as required by Arizona law. And in Bower v. Ducey (D. Ariz. Dec. 9, 2020), the district court largely dismissed the plaintiffs' complaint on the grounds of lack of standing, ruling that the plaintiffs' claims were largely based on, "anonymous witnesses, hearsay, and irrelevant analysis of unrelated elections."⁶ This ruling undermined Trump's claim that the state of Arizona allowed fraud in the counting and fabrication of hundreds of thousands of illegal ballots, including fraud related to the use of Dominion Election Systems' hardware and software in Maricopa County. These cases, reflecting rulings by judges across the political spectrum and in multiple states, ruled on two unequivocal facts: President Trump lost the 2020 election and there were no clear signs of election fraud. Because these facts have been established, new raids and investigations seeking to undermine them do nothing but cause fear, chaos, and undermine the integrity of our elections.

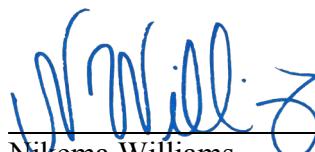

Therefore, I demand that the FBI and DOJ cease its investigation and intrusive raid into the Fulton County, Georgia election office. The raid was sudden and unjustified based on the facts of law. In addition to ceasing its baseless investigation and removing the FBI from the election office, we also demand an answer to the following question by February 13, 2026:

1. What new facts led the FBI to seek a warrant to raid this Fulton County election office on January 29, 2026.
2. Who was the authorizing judge for the warrant justifying the raid?
3. Did the FBI or DOJ consult with or coordinate with local election officials ahead of the raid? If so, which election officials were consulted?
4. Was President Trump aware of this raid before it was conducted? What role, if any, did the President have in directing or suggesting this raid?
5. What evidence are you seeking to gather that is specified in the search warrant?
6. Once this evidence has been gathered, what is the plan to release and discuss the obtained evidence with Congress?

The 2020 election was not stolen and was won by President Biden. Raids and renewed investigations based on the lie that President Trump won the election lack a factual basis and only serve to intimidate voters and undermine the integrity of our upcoming elections.

I look forward to your prompt response.

Sincerely,

Nikema Williams
Member of Congress
