

Tech to Save Moms Act

Coleads: Nikema Williams, Lauren Underwood, David Joyce, Ashley Hinson.

The Tech to Save Moms Act is bipartisan legislation to support the use of technology to help close the gap in maternal health care and address the racial and ethnic disparities in maternal mortality outcomes.

Specifically, This Bill Will:

1. Require the Center for Medicare & Medicaid Innovation to consider models that improve the integration of telehealth services in maternal health care.
2. Authorize funding for technology-enabled collaborative learning and capacity building models that will develop and disseminate instructional programming and training for maternity care providers in rural and underserved areas, covering topics such as:
 - a. Safety and quality improvement.
 - b. Addressing maternal mental and behavioral health conditions.
 - c. Identifying social determinants of health risks in the prenatal and postpartum periods.
3. Establish a grant program to promote digital tools designed to improve maternal health outcomes, particularly in rural and underserved communities.
4. Commission a comprehensive study on the use of technology in maternity care to reduce maternal mortality, morbidity, and disparities
